

"I was scheduled for surgery on the 12th of December. Prior to using liquid Zeolite, the tumor was the size of a goose egg. It was hard and very painful for me to sit. Thanks to this liquid Zeolite, I have cancelled my surgery. The tumor is next to nothing. After only 3 days the mass started to soften and lessen in size. I am so incredibly happy that I gave this product a chance. I have been taking 10 drops 3 times per day. I had several days I only took 3 drops 3 times per day. However, now after ONLY A WEEK; I have cancelled my surgery."

"I would like to share my experience from using liquid Zeolite. I have fibrocystic breast tissue; my breasts are usually tender and lumpy to touch. My doctor has been watching a lumpy area to my right breast. I had a needle biopsy in July and a breast exam to recheck the area in October. I began using liquid Zeolite about three weeks prior to my breast exam. I noticed my breasts were much less tender and lumpy. During the exam my doctor was unable to find the lump."

"Patient #1 - A 23 year old woman, who has been a chiropractic patient of mine for 3 years heard about the effects of liquid Zeolite and told me she had genital warts. (These warts are known to be caused by a virus called HPV Pamplona virus, which is also known to cause cervical cancer). She had them burned; they came back, took medication and put medicated ointment on them without any change. I told her she had nothing to lose by trying a liquid Zeolite formula at 10 drops 3 times a day. One week later she complained they were bigger and painful. I told her to increase the drops to 15 at 3 times a day, she did. I saw her the next week but I forgot to inquire about them. The following week I asked her and she told me that last week she wanted to let me know but forgot. She had this big smile on her face and told me one morning she woke up and they were all gone!! Four weeks since then and she is still free of them!

Patient # 2 - A lady has been suffering for a few days of nasal congestion, runny nose and had lost her voice and her chest was congested. She took 10 drops of liquid Zeolite in the morning and by the afternoon her voice was back, her nose was cleared and three days later her chest was completely normal. Also for the first time in years she was able to have a daily bowel movement."

"It all started 28 years ago when I became pregnant. The old saying, "Oh you have heartburn because your baby has lots of hair". Well after the baby was born heartburn did subside. 2 t=years after I was pregnant again the heartburn started again. I was relieved again for several years. After some time the symptoms started again and this time they were getting worse. I started on Tums, Roloids, and ect. This seemed to help solve the problem for years. As I got older the symptoms exceedingly got more frequent and severe. I would wake up in the middle of the night where I could not get my breath, I felt as though I was suffocating for air. The acid was so severe it would make me regurgitate everything I had eaten. Instead of one or two tablets like the directions called for I was up to 4 to 6 tablets every hour. I would get relieve and feel better. Now the pills were not helping only throwing up everything would relieve the pressure and nauseating feeling. I was getting to the point I did not want to eat because I was afraid of the symptoms that were to follow. I could not go through the agony. One day my husband told me about liquid Zeolite. I immediately told him I would like to try it. Trust me when you have been what I have been through I wanted to try everything except a doctor. Because I was afraid they would find everything wrong except what was ailing me. I am very stubborn this way. You get to a point that you will just about try anything for relief. Immediately I tried it. I am

still at 10 drops 3 times a day and my acid reflux is dissipating. I immediately found relief the first day. After a week my assistant who works with me who should know me after 3 years told me my mood was even milder. I have been relieved of severe acid reflux. I stopped for about a week because of things that had happened in my life and I immediately had acid reflux. So when you start you keep taking it faithfully. It really has been a life saver to me and I tell everyone about this amazing product. I was a little surprised at the little bottle and the drops only look like water, but the unbelievable results in that bottle is for me."

"I am 33 years old, and from Los Angeles. I have been suffering from what has now been diagnosed as fibromyalgia. My symptoms are joint pain in various places, fatigue, exhaustion, and depression. I have tried everything to get better: massages, herbs, acupressure, acupuncture, glucosamine. Nothing worked for me. Finally tried some liquid Zeolite. I started taking it a little bit each day - 15 drops, 3x a day. That was about 2 1/2 weeks ago. After the first week I started to feel ok, but had a bit of a red, flush feeling. Within one week, I started to feel great. Then I ran out of Zeolite, and noticed immediately that my symptoms returned. I called my supplier frantically on 11/7 to overnight me more liquid Zeolite. She got it to me within 2 days, and I was thrilled. It's been about 8 days later, and I no longer have any joint pain, and can't remember the last time I felt this goods."

Michelle S. - Los Angeles, CA.

"My name is CMSgt Gene P, USAF, Retired. I am the spouse of Julia (Judy) P. In late October 2004 Judy found a lump on her left breast, we were already scheduled for our annual physical the first week in November, so we elected to wait until the appointment. The doctor immediately scheduled her for a Mammogram which did not show the lump, she then had an ultrasound which did show the lump. An appointment was made for surgery in January 2005 to remove the left breast, meanwhile in mid November Judy started bleeding severely from her stools, a colonoscopy was done in December in which was discovered two polyp on the wall of her colon, which required surgery, a biopsy showed the polyps were benign. Judy had the breast surgery in January 2005 only to discover she was in stage 2 cancer, lymph nodes from the arm pit indicated the cancer had entered her blood stream. A PET scan was done in March which entered her liver. A CAT scan in June 2005 was viewed, and the liver was clean of cancer. (We used Milk Thistle). We started Judy on herbs immediately in November, 2004 and she could not start Chemo until May 2005 due to having colon surgery in March. The seven sessions of Chemo and the 15 sessions of Radiation all but killed Judy, she was literally dying in my arms. Prayers were coming in from all over the world for Judy, we continued to use as many herbs as we knew would help, along with prescribed medication from the doctors. Judy continued to "hang on" but was still struggling. Her appetite was weak, her color was grey, and she vomited often. The months rolled along and then in October a friend called me about a mineral she thought might help Judy. I immediately got some activated liquid Zeolite to give it a try, anything the help my bride of 42 years. Judy started taking the drops around Oct. 26, 2005, and the improvement in her physical and mental appearance was amazing. Her color is back to normal, her appetite is better, a lot less vomiting, she even helps with the cooking and clothes washing. She walks more around the house and out in the yard to play with our dogs, and just this past week we went Christmas shopping and 10 stores later she was still strong and wanted to go out to eat (first time in 9 months). The drops are so amazing; I thank God for the discovery of them and sing its praise to all who have ears. Judy is on the mend and even with a tumor imbedded onto her spine, I think that ole tumor better start looking for an evacuation order real soon. One last comment.... Judy had a rash on the nipple of her left breast in early 2004, the doctor treated it with topical creams, it never went away, today we know it was Pageant's disease, had we started cancer treatment then Judy would have come through alot better with alot less pain and suffering....but she's alive, and getting better everyday, praise God."

"My saga begins in the mid 80's to Mid 90's when I worked for 8 years in a building that was chemically toxic. The building had housed a caret cleaning business and they rented to the company I worked for. They cleaned our carpets free every few months as a "perk" for us. I noticed, especially when it was real humid, that there was this horrible smell and my eyes and sinuses would be affected. We had an unusually high rate of illness 30-80% on any given week. Upon inspection, three chemical toxins were found and they were imbedded in the concrete so the only way to get rid of them was to tear the building down. As years went on we had more and more colds, sinus and allergy problems. My sinus problems got to where they wouldn't go away and I started having ear infections. I had a miscarriage that led to discovering dysphasia of the cervix and a hysterectomy and 3 ear surgeries. I still had lots of sinus problems too. I felt it was because I was toxic. I tried a lot of ways to detoxify myself but nothing seemed to handle it. I figured it was toxic heavy metals and I would have to live with it. I was having all kinds of circulation problems, retaining water and couldn't ever seem to get over sinus infections. I was tired and cranky. Then I heard about activated liquid Zeolite. I was excited and cautious at the same time. I got some and WOW! 2 hours after the first dose my eyesight got clearer and the pressure in my left ear left. The first night I slept great. I noticed I had more energy and no fogginess when I got up. I had no puffiness under my eyes, my knees and feet weren't sore, my fingers weren't swollen. I was very excited! I kept taking it and things kept happening. My "arthritic knee" the doctor told me I had to live with suddenly didn't hurt and I could get up off the floor without limping and having to let it "work itself out". My skin looks and feels soft and the right color. I firmed up dramatically. Before I had loose bags under my eyes and chin and they were gone. In fact I noticed the skin on my whole body was firmer, even teeth that had been real loose. I don't have weird ticks or twitches anymore either. I swear my hair is shinier too. I noticed less hair falling out when I wash it. I also saw that there was no "gunk" under my finger and toe nails and the misshapen nails were straightening out. I hadn't even been taking the activated liquid Zeolite for a week yet!! Most of my complaints were things my doctor said were due to aging and I'd have to live with them. Boy was he wrong. After 3 ear surgeries I have loud cracking and banging noises in my ear. The doctor said it was from nerve damage and probably wouldn't go away. Well I haven't had any lately. The vertigo I was left with is way, way better and all the yeast infections I've had post surgeries are gone! I feel like I'm 20 years younger and I've achieved this with NO side effects and no depletions or deficiencies in my body. The changes are dramatic due to extreme exposure to toxins, but I would have been happy to just not feel tired. I'm celebrating 2 full weeks of detoxing today. Thanks to activated liquid Zeolite, my body doesn't suck anymore!!! I'm looking brightly to the future! Thanks!
